SHIFT_the way you move

NISSAN 370Z

Every effort has been made to ensure that the content of this brochure is correct at the time of going to print (May 2010). This brochure has been produced featuring prototype vehicles exhibited at motor shows and, in accordance with the company's policy of continuously improving its products. Nissan South Africa reserves the right to change the specification and the vehicles described and shown in this publication at any time. Nissan dealers will be informed of any such modifications as quickly as possible. Please check with your local Nissan dealer to receive the most up-to-date information. Due to the limitations of the printing processes used, the colours shown in this brochure may differ slightly from the actual colours of the paint and interior trim materials used. All rights reserved. Reproduction in whole or part of this brochure without the written permission of Nissan is forbidden.

SHIFT_

A single word that captures more than a vision. More than a philosophy. It's a dedication to looking at the familiar in a different way. To opening the mind to new ways of thinking. And forever advancing the way people move through the world.

THE ALL-NEW NISSAN Z

Feast your eyes, smell a hint of leather and listen to your heart race. Whether you prefer the Roadster or the Coupé you know you were born to drive a Z. Like you, it's polished, powerful and has a taste for adventure.

MORE THAN 40 YEARS OF DEDICATION TO A SINGLE, ADRENALINE-FUELED GOAL
For a sports car to succeed through multiple generations and retain iconic status shows the making of a true legend. Since 1969 when the first generation 240Z took the motoring world by storm, many have been fortunate to experience the combination of passion, precision and performance that embodies every Z.

The Nissan 370Z proudly boasts these adrenalin-inducing elements that have made the Zs some of the most sought-after cars to ever take to the road. Striking trend-setting improvements in performance and quality, coupled with ultramodern styling make the new Nissan 370Z the ultimate showpiece to satisfy both Nissan's passion to design the finest sports car and your passion to drive one.

External appearance reflects what's on the inside. When the sheer energy of the 370Z's performance is given bodily form, the result is a streamlined muscular profile ready for action. Pure exhilaration awaits around every bend.

THE MOST POWERFUL Z EVER

The legend continues in the 370Z with the fourth generation VQ engine. Now increased to 3.7ℓ for massive power, this 245kW VQ engine features advanced Variable Valve Event and Lift (VVEL) technology that continuously tunes valve lift and timing for quicker response and a broader torque curve, while optimising fuel economy and reducing emissions. And while this extensive engineering may sound intriguing on paper, the exhilaration from idle to the 7000 rpm redline – on the straights or through the corners – is pure magic.

LIGHTWEIGHT COMPONENTS

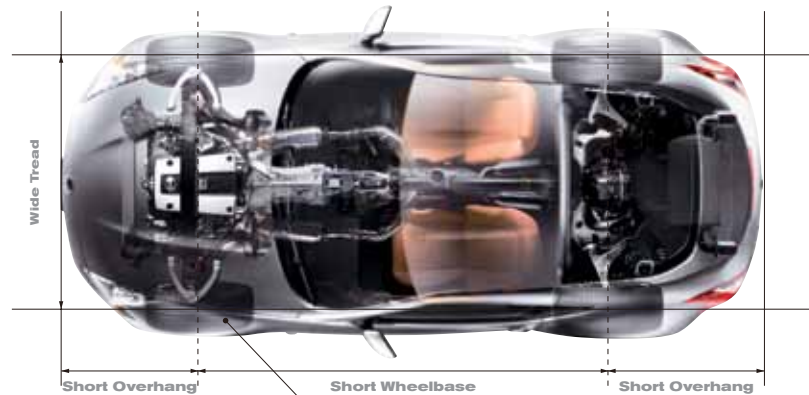

If you want a true indication of a vehicle's performance, look no further than its power-to-weight ratio. So along with the added power of the 3.7ℓ VO V6 engine, Nissan scrutinised every ounce of the all-new 370Z. Weight was reduced from areas you might expect – changing the rear hatch and doors to ultra-strong lightweight aluminium – as well as in areas you might not – 1.6kg were shaved from the audio system. High-tech materials include a carbon-fibre composite driveshaft that is not only incredibly strong, but also helps the engine rev more quickly, as well as a weight-saving carbon-fibre composite radiator support structure. More power. Less weight. Quicker acceleration and agile response. Truly a win-win situation.

With its short wheelbase and wide track, the 370Z hugs the road, while its quick, nimble response, smooth predictable linearity and precise, reassuring stability make the Nissan 370Z easy to handle.

HUMAN/MACHINE SYNTHESIS

Integrating man and machine into a single, seamless body is what sets the 370Z apart. With the 370Z's front engine, rear wheel drive configuration and responsive steering, you're at the heart of the vehicle with all five senses engaged to give you total control.

Short wheelbase, wide tread and large tyres

The 370Z's short wheelbase provides remarkably agile, responsive handling while the wide track and large tyres combine with the low centre of gravity to give you a solid grip on the road.

Getting the balance right

With reinforcements like bolt-on underbody braces and a trigonal tower bar, the 370Z's rigid frame performs reliably during cornering, while the widespread deployment of aluminum on cover parts – including the doors and hatch as well as the hood – has made it possible to keep the car's overall weight down.

Trigonal tower bar

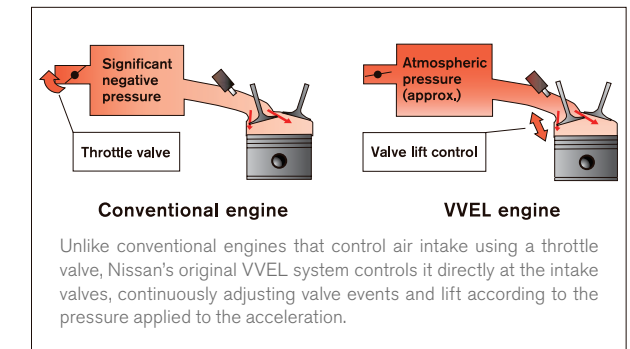

TAKE A RIDE ON THE WILD SIDE

Wild at heart, yet eager to please, the 370Z's spirited 3.7-litre VQ V6 engine delivers an amazing 245kW of road-pounding power at maximum output, while Nissan's original VVEL (Variable Valve Event and Lift) system helps you stay in control by ensuring a matching response to even subtle variations in pressure on the accelerator.

VQ37VHR engine

VVEL system

Conventional engine

Unlike conventional engines that control air intake using a throttle valve, Nissan's original VVEL system controls it directly at the intake valves, continuously adjusting valve events and lift according to the pressure applied to the accelerator.

VVEL engine

VQ37VHR engine

Rated at 245kW at 7000 rpm with a peak torque of 363Nm at 5200 rpm, this large-displacement 3.7-litre engine boasts a longer and flatter torque curve, delivering smooth acceleration and outstanding throttle response.

Variable Valve Event and Lift System (VVE)

By improving the efficiency of airflow through the cylinder, this unique system significantly improves responsiveness, optimising the balance between power and environmental performance to deliver high output with lower fuel consumption and cleaner emissions.

Fully symmetrical air intakes/exhausts

With individual air cleaners for both left and right V-banks, air intake/exhaust efficiency is improved, giving you quicker response and higher power, as well as cleaner exhaust, all while emitting a deep, rumbling sporty growl.

Designed to respond quickly and precisely to every turn of the wheel, the 370Z's finely tuned suspension reacts quickly to the driver or bumps in the road, while the outstanding braking power brings you to a stop exactly when and where you want.

Rugged, responsive suspension

Lightweight yet extremely durable thanks to the use of aluminium components, the 370Z's double-wishbone front suspension offers a swift linear response to steering changes, while its multi-link rear suspension helps the large-diameter tyres maintain maximum contact with the road.

High performance shock absorbers

In addition to a dual-flow-path design and internal rebound springs, the shock absorbers also feature high-performance ripple control, improving performance and controlling friction for more responsive handling and excellent riding comfort.

Brake system

The combination of front opposed 4-piston aluminium calipers and a link-type brake pedal provides precise and predictable stopping performance, assuring ease of use around town or in a traffic jam.

Whether you prefer the flexibility of manual control or the convenience of an automatic transmission, you're always in command with the 370Z. Experience the thrill of a perfectly matched downshift and feel the satisfaction of smooth, precise shifting anytime.

7 SPEED AUTOMATIC TRANSMISSION WITH MANUAL MODE

With 7 speeds and a manual mode, the 370Z's automatic transmission provides smooth seamless shifting, comfortable fuel efficient high speed cruising and heart pounding acceleration, whenever you want it. In manual mode, you get manual style control with exceptionally quick shifts with a nudge of the shift lever or a pull of the paddle shifters, ideal when you want to downshift to pass traffic or for more effective braking.

WORLD'S FIRST SYNCHROREV MATCHING MANUAL TRANSMISSION

In the past, smooth downshifting required a delicate balancing act of matching the engine speed and letting out the clutch – fine for the racetrack, but difficult to execute on the street. With SynchroRev Match technology a seamless downshift is in the palm of your hand. By smoothing the transitions between shifts, the chassis stays more balanced, especially important when tackling an exhilarating corner – making this one transmission that's as much about handling as it is about power.

The instant you sit down in the 370Z, you'll feel connected, an integral part of this hybrid of man and machine. From the iconic driver-angled triple meter cluster to the fine stitching and quality upholstery, everything about the 370Z's interior puts you in a driving state of mind.

Time, voltage and oil temperature gauges

Driver and passenger power seats (sliding/reclining)

Tilt adjustable steering wheel

Push button ignition and intelligent key

Large-diameter triple meter cluster

Centred around a large-diameter tachometer that makes sure the driver always knows exactly when and where to shift up, this multi-layered configuration is easily visible to the driver.

Optimum steering wheel rim design

The steering wheel rim design ensures maximum meter visibility.

Multi-information display

This includes average fuel consumption, available cruising distance and maintenance information.

PREMIUM AUDIO SYSTEM

Because even the most dedicated enthusiast might want to listen to something other than its spine-tingling dual exhaust note, the 370Z features a premium audio system with 8 BOSE® speakers and 2 subwoofers that is custom engineered for the unique shape of the Z's interior. And with MP3 compatibility you can have the perfect soundtrack for any driving adventure.

IPOD AND HANDSFREE BLUETOOTH COMPATIBILITY

Plug your iPod® into the available interface system and you can control its functions through the audio system. Both hands on the wheel means no hands on the cell phone. The integrated handsfree Bluetooth system has a voice recognition feature that allows you to make and receive calls through the stereo speaker system.

NISSAN INTELLIGENT KEY

Never take your keys out of your pocket or briefcase again. Nissan Intelligent Key is so intuitive, it senses your approach to the car and allows you to unlock the door by just tapping a button on the handle. Once inside, start the engine without ever putting a key in the ignition.

NISSAN INFOTAINMENT/NAVIGATION SYSTEM OPTION

40GB HDD Navigation system

- 7" VGA touch screen monitor and voice recognition
- WVGA high resolution MAP display
- Navigation guide is in 3D, plain or birds-eye view map display
- Enhanced place of interest search is available
- High quality user interface
- High definition touch panel screen

Entertainment System

- DVD video playback
- Can record 3000 songs in HDD via CD 9.3 GB Music Box hard drive for digital music storage and playback (Music format MP3, WMA, AAC)
- Auxiliary audio/video input jacks
- This package replaces the previous specification (in-dash 6-CD changer)

FREEDOM OF THE ROAD

Before it could be a Roadster, it had to be a Z. That is why 370Z Roadster moves with authority and handles like a dream. All you need is a little wind in your hair and some sunshine on your shoulders. Just open the top and leave your cares behind. Introducing the all-new 370Z Roadster.

THE JOURNEY BEGINS

The dramatic 370Z Roadster, designed from the outset as a convertible. 20 seconds and just one push of a button is all it takes to go from snug to smoldering hot in this dynamic Roadster with its fully automatic, latch-free, soft-top. Then turn on the ignition to experience the thrill of a lower, leaner and faster ride that is notably stiffer than its predecessor, the 350Z Roadster. Now all there is left to do is let the 370Z Roadster's dynamic performance guide you on your journey.

A 245kW OPEN INVITATION

When the open road calls, there's only one way to respond, with 245kW under your foot and an endless sky overhead, the 370Z Roadster was thoughtfully designed for the real world, passionately engineered to leave it all far behind.

More sun, more stars, more fresh air in just 20 seconds. The 370Z Roadster offers you a refined open-air experience without wind turbulence. It is because the entire cabin has been carefully crafted for a composed driving experience to ensure that the same comfortable ride awaits its occupants: top up or top down.

The improved front window moulds and rear glass wind deflector minimise wind turbulence inside the cabin.

Rear glass wind deflector

Top control switch

The top can be easily opened or closed by flipping a switch on the center console.

Black (standard)

The new double-insulated roof with new improved high quality material helps keep the interior warmer while reducing road noise to a minimum.

Power convertible soft-top

On hot summer days, you can air out the interior before you get in. The intelligent key system lets you open the soft top by pushing buttons on the exterior door handles on both the driver's and passenger's sides.

Power tonneau cover

The tonneau cover opens and closes automatically when the top is lowered or raised to slide beneath it for a stylish appearance during top-down driving.

Automatic roof lock

Press one button to open or close the roof, which locks automatically after you lift the top.

SAFETY SHIELD

Nissan's concept of "the vehicle that helps protect people."

In the commitment to "Real World Safety", Nissan pursues innovation as part of its Safety Shield concept. Based on the idea that cars should help protect people, advanced, proactive safety technologies help driver and passengers to avoid danger and injury in a wide range of circumstances. Visit www.nissan.co.za to find out more.

Technologies that help the driver to maintain safe driving conditions

Even when risk has not appeared, Nissan technologies make it easier for the driver to maintain safe driving conditions. Some of these innovations reduce the driver's burden, while others enhance visibility and awareness of the immediate surroundings at night and when parking.

Bi-Xenon High-intensity Discharge (HID) headlamps

Provide intense long-range illumination and feature headlamp washers to ensure optimum visibility in all weather conditions.

LED high-mounted stop lamp

Makes sure the car behind you knows when you're braking.

LED rear combination lamps

Quick illumination gives following drivers more time to react.

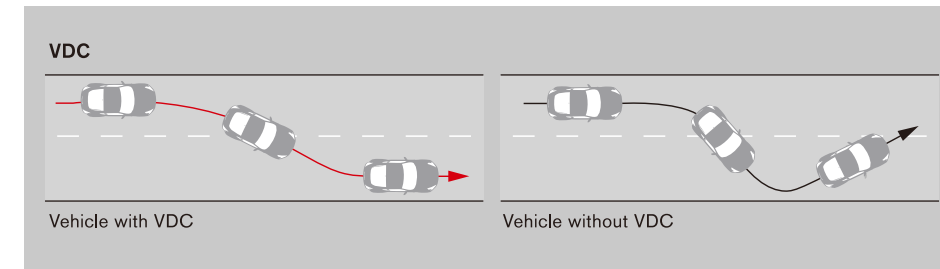

Rear fog lamp

Provides extra illumination in haze, fog and other low-visibility conditions.

Technologies that help the driver to recover from dangerous driving conditions

When a risk appears, warnings and automatic countermeasures help the driver avoid it.

Vehicle Dynamic Control (VDC)

VDC automatically controls brake and engine output to enhance stability when sensors detect that the vehicle may slip sideways, due to steering, braking or accelerator pedal operation.

ABS with EBD and BA

The Anti-lock Braking System (ABS) helps prevent skidding in emergency braking, while Electronic Brake force Distribution (EBD) contributes to safe driving by enhancing braking control to optimise braking performance with different loads. A Brake Assist (BA) system is also provided.

Technologies that help minimize the damage when a collision is unavoidable.

In cases when a crash cannot be avoided, Nissan technology helps reduce injuries and damage. Through high specification restraining and airbag technology with a safety cell with engineered crumple zones and impact bars.

Dual front, side and curtain SRS airbags

Together with pretensioner front seatbelts, these Supplemental Restraint System (SRS) airbags help to reduce the risk of injury resulting from an impact.

SRS door-mounted curtain air bags

In the Roadster, these bags provide an extra measure of upper-body protection.

Active head restraints

Support the head by moving forward in the event of a collision.

Nissan's commitment to the environment

Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program 2010 aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.

ACCESSORIES

The all-new Nissan 370Z is so much more than a car, it's a high-performance machine designed to evoke exhilaration. With a vehicle that comes standard with all the bells and whistles you may desire, NISSAN still offers you an opportunity to customise your Z.

CARPET SET:

High quality tufted carpet set.
Stylish design, featuring contrast stitching for luxury appearance.
Includes matching boot carpet.
370Z embroidery on carpets and boot carpet.

MUDGUARD SET:

Protect paintwork from stone chips.

Nissan's commitment to quality

To provide all customers with a consistently high level of quality, Nissan applies the same standards worldwide, to ensure that all Nissan owners enjoy peace of mind for the lives of their vehicles.

The approach is based on quality from the customer's perspective on three key elements:

First, the expectation of a smooth driving experience with complete peace of mind. Second, the intangible appeal of a vehicle, its power to captivate and excite, with features that capture attention and imagination. Third, the level of attentiveness and service during the sales process, and long after the sale is concluded.

Nissan's commitment to the environment

Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program 2010 aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.
